 Suchthilfeverbund Duisburg e.V.

In order to implement addiction prevention successfully, it is necessary to sensitize the public to this topic and to reach as many people as possible through multipliers. This is the reason we work in a network-based manner and collaborate with specialists from child daycare facilities, schools, youth welfare services, training institutions, and vocational schools.

Addiction prevention is primarily geared toward children, adolescents, and parents. Our area of responsibility also includes addiction prevention at the job and addiction prevention in seniors.

The central areas of our work are:

- To offer continuing education and consulting services for professionals and teams (multipliers)
- To organize symposiums and informational events
- To plan, assist with, and support projects for different target groups
- To foster public relations and to coordinate addiction-preventive initiatives
- To provide specialized work materials (fliers, literature, specific „methodology toolboxes“)

The Center for Addiction Prevention is part of the Addiction Prevention for North Rhine-Westphalia and is based on the overall framework concept.
